

Prizes 2022

- **2022 Fondazione Oronzio e Niccolò De Nora Fellowship in Electrochemistry:**
Mr. Kevin Yang (Northeastern University, Boston): “Novel Electrolyzer for Efficient Production of Commodity Chemicals”
- **Società Chimica Italiana:**
 - **Luca Casanova** (Politecnico di Milano) for the thesis “Pulsed anodizing treatments to increase the corrosion resistance of CP titanium in acidic environment”
 - **Williane Da Silva Freitas** (Tor Vergata University of Rome) for the thesis “Development of Platinum Group Metal-Free Electrocatalysts for Oxygen Reduction Reaction in Electrochemical Devices”
- **International Society of Electrochemistry:**
 - **Young Author Prize: Sara Grecchi**, University of Milano for the article “Natural-based chiral task-specific deep eutectic solvents: A novel, effective tool for enantiodiscrimination in electroanalysis” published on *Electrochim. Acta*. Vol. 380 (2021), article 138189

Sponsorships 2022

- **Società Chimica Italiana:**
 - Chemistry Games open to secondary school students in Lombardy in November
 - Merck Young Chemists’ Symposium in Rimini (Italy) in November
- **Gara Nazionale di Chimica – the National Chemistry Contest** organised in May in Milano by the Ministry of Education for the best fourth-year students at technical institutes specializing in chemistry
- **“Alessandro Volta’s heritage and the great challenges for humanity: the past and the future of electrochemistry”**: a one-day conference organized by CNR (National Research Council) and IUPAC (International Union of Pure and Applied Chemistry) in Como (Italy).
