

2011 Prizes

- **Oronzio and Niccolò De Nora Foundation Fellowships** in Applied Electrochemistry:
 - **Manabu Tokushige** (Norwegian University of Science and Technology - Norway) - “Electrochemical synthesis of metallic nanoparticles”
 - **Heung Chan Lee** (The University of Texas at Austin - USA) - “ Research project for a photoelectrochemical water splitting system”
- **International Society of Electrochemistry (ISE):**
 - **Young Author Prize: Meng Li - Brookhaven National Laboratory (BNL), New York (USA)** for the study “New ternary Pt-Rh-SnO₂ electrocatalysts for the direct oxidation of ethanol to CO₂ at fuel cell anodes” published in *Electrochimica Acta* 54.
- **Società Chimica Italiana:**
 - Prize to **Mauro Pasta** (Università degli Studi di Milano) - “Glucose electrooxidation”
 - Prize to **Stefania Siracusano** (ITAE-CNR Messina) - “Development and characterization of catalysts for electrolytic hydrogen production and chlor-alkali electrolysis cells”
